LDAP Settings

- LDAP Configuration
- Import Settings

ⓘ   To configure your LDAP integration you will need to provide the mappings between Okta Users / Groups and Users, Groups, and Roles in your directory. This will allow for your directory contents to be accurately reflected in Okta.

VERSION

LDAP Version

> OpenDJ

Select an LDAP version to pre-populate the fields below

CONFIGURATION

Objects

Unique Identifier Attribute

> entryuuid

The attribute on all Objects that contains a unique, immutable ID

DN Attribute

> entrydn

The attribute on all Objects that contains a Distinguished Name

User

User Search Base

> ou=People,dc=example,dc=com

The container to perform User searches in

User Object Class

> inetorgperson

The ObjectClass of a User

Account Disabled Value

> TRUE

The value that indicates an account is disabled, e.g. "TRUE"

Password Attribute

> userpassword

The attribute on a User used to indicate password

Password Expiration Attribute

> ds-pwp-password-expiration-time

The attribute on a User used to indicate if password is expired

Extra User Attributes

Extra User Attribute 1

Extra User Attribute 2

Extra User Attribute 3

Extra User Attribute 4

Group

Group Search Base

> ou=groups,dc=example,dc=com

The container to perform Group searches in

Group Object Class

> groupofnames

The ObjectClass of a Group

Group Object Filter

> (objectclass=groupofnames)

LDAP search filter to use when searching group objects

Member Attribute

> member

Defines which users are members of the group

User Attribute

Used by the User object to define which groups the user is a member of

Role

Object Class

The ObjectClass of a Role

Membership Attribute

The attribute on a User that indicates membership in a Role

VALIDATE CONFIGURATION

Before you update your configuration, validate your settings by entering a username here to confirm that the User properties and Group memberships you expect will be properly fetched from your LDAP instance.

Example username

> bubba@example.com

Enter a username as per your Username Preference

Test Configuration

✓ **Validation successful!**

Status	Active
UID	bubba@example.com
Unique ID	bubba@example.com
Distinguished Name	bubba@example.com
